11	HDMI™ – INSTALLATION & ACCESSORIES	25

High Definition Multimedia Interface (HDMI™) was invented in 2003 and transmits picture and sound signals digitally - with just one cable.

HDMI™ CONNECTS CONSUMER ELECTRONICS

Television

Hi-Fi

Beamer

Console

THERE ARE CURRENTLY THREE HDMI™ STANDARDS ON THE MARKET

FAST. HIGH-SPEED HDMI™ (1.4)

Optimal e.g. for Blu-Rays: Supports with up to 10.2 Gbit/s as the first HDMI™ standard a resolution of 4K at up to 30 Hz, 3D in Full-HD and Deep-Color. New features: an Ethernet (HEC) and an Audio Return Channel (ARC).

FASTER. HIGH-SPEED HDMI™ (2.0)

For outstanding home theater: Streams at 4K resolution at 60 Hz and supports 32-channel audio. 18 Gbps makes parallel streaming of multiple audio and video channels possible. New: High Dynamic Range (HDR) 10 .

FASTEST. ULTRA-HIGH-SPEED HDMI™ (2.1)

For a smooth gaming experience: Transmits picture and sound ultra-fast at up to 48 Gbit/s and 10K at up to 120 Hz - razor-sharp and brilliant thanks to enhanced Audio Return Channel (eARC) and Dynamic High Dynamic Range (HDR) 10+ .

ADVANTAGES OF HIGH-SPEED HDMI™ AND ULTRA-HIGH-SPEED HDMI™

ARC and eARC: brilliant pictures, clear sound

Audio Return Channel (ARC) sends and receives picture and sound, saving cables. HDMI™ 2.1 achieves higher sound quality on 32 channels with enhanced Audio Return Channel (eARC), 7.1 surround sound and images with Dolby True Atmos or DTS:X.

VRR: smooth gameplay

Variable Refresh Rate (VRR) flexibly adjusts the monitor's frame rate to the graphics chip's frame rate - for smooth gameplay, even when there are many opponents on the field, for example.

HDR: optimal contrasts, natural images

High Dynamic Range (HDR) adjusts contrast and brightness so that scenes look more natural than ever before. There are two options: Static HDR 10 sets the values once at the beginning. HDR 10+ adjusts frame by frame.

Static HDR 10

Dynamic HDR 10+

REFRESH RATE

A refresh rate of 200 Hz corresponds to a display of 200 frames per second. The more frames per second that are displayed, the smoother the movement and the higher the image quality. So this feature is especially interesting for gamers. With 3D technologies, a higher refresh rate is necessary to achieve good image quality.

DATA RATE

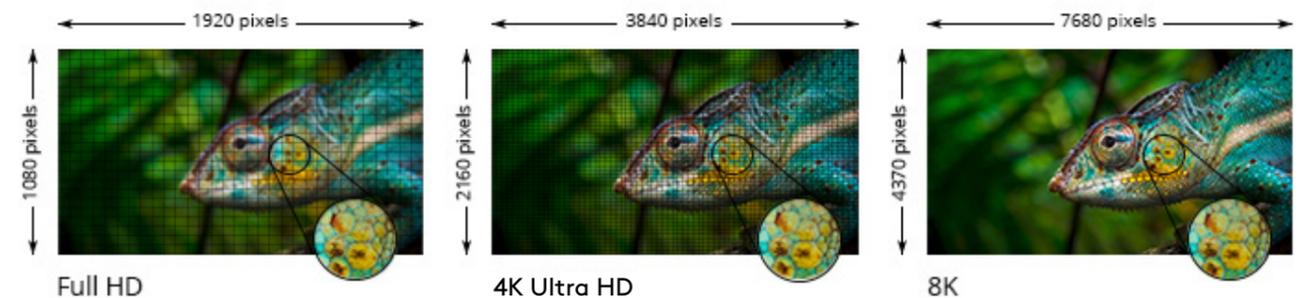

Also called transmission speed or transfer rate. It describes the speed at which data is transferred and has an influence on sound and picture quality. It is specified in bit/s, kbit/s, Mbit/s or Gbit/s.

IMAGE FORMAT

Refers to the maximum screen resolution and can be classified into VGA (640 x 480), HD (1280 x 720), Full-HD (1920x1080), 4K (3840x2160) and 8K (7680x4320). The higher the resolution, the sharper the image.

By the way: If there is no HDMI™ connection on the TV or monitor, a whole range of HDMI™ adapters will help to ensure problem-free transmission.

Goobay Series 1.4

High Speed HDMI™ Cable with Ethernet

HDMI™ male (type A) > HDMI™ male (type A)

- High-resolution signal transmission with up to 4K @ 30 Hz offers optimal enjoyment. In addition, the cable supports all common features such as ARC (Audio Return Channel), HDCP or 3D.
- The HDMI™ cable connects TV sets or PC monitors with games consoles (such as Playstation or Xbox), beamers/projectors or streaming receivers (such as Amazon Fire TV, Apple TV).
- Gold-plated HDMI™ connectors and advanced technology guarantee flawless signal transmission, clear picture quality, unparalleled video quality, razor-sharp and precise sound.

Optical Hybrid (AOC)

High-speed cable 4K @ 60 Hz for long transmission distances

- High-resolution signal transmission with up to 4K @ 60 Hz (downward compatible) offers optimal enjoyment. In addition, the cable supports all common features such as ARC (Audio Return Channel), HDCP or 3D.
- The metal plugs with kink protection are extremely robust and of high quality. The gold-plated connections with low contact resistance ensure the best possible signal transmission.
- The optimal transmission option for long distances. The fibre-optic cable combines the advantages of optimal transmission speed and low susceptibility to interference, especially for long cable runs without amplification.
- AOC technology (Active Optical Cable) converts the electrical signal into an optical signal and back into an electrical signal at the end of the line. (The signal direction must be observed when connecting.)

10.00 m	59804	Cable Reel	RRP	39.99 €
20.00 m	59806	Cable Reel	RRP	49.99 €
30.00 m	59807	Cable Reel	RRP	59.99 €

Goobay Series 2.1 8K

Ultra High Speed HDMI™ Cable with Ethernet

High speed cable for 8K @ 60 Hz

- High-resolution Ultra HD signal transmission with up to 8K @ 60 Hz and 4K @ 120 Hz 3D offers optimal enjoyment. In addition, the cable supports all common features such as ARC (Audio Return Channel), HDCP or 3D.
- uninterrupted movements (no juddering) and transitions, Variable Refresh Rate (VRR)
- new HDMI™ standard for impeccable movie and gaming experiences
- The HDMI cable connects TV sets or PC monitors with games consoles (such as Playstation or Xbox), beamers/projectors or streaming receivers (such as Amazon Fire TV, Apple TV).
- Gold-plated HDMI connectors and advanced technology guarantee flawless signal transmission, clear picture quality, unparalleled video quality, razor-sharp and precise sound.
- especially for games consoles with high resolution image (4K @ 120 Hz, 8K @ 60 Hz) such as Sony Playstation 5 (PS 5) or Microsoft Xbox Series X.
