

USB-C™ TO DISPLAYPORT ADAPTER CABLE

Smooth streaming and presenting in 4K over one metre and many years. The reason: a strong plug, gold-plated connectors and a flexible double shielded premium cable.

A PLUG THAT PROTECTS AGAINST CABLE BREAKAGE

The plug of the Clicktronic USB-C™ to DisplayPort adapter cable consists of three ABS and PVC parts, making it both flexible and robust: if you, for instance, pull the cable with a jerk, it absorbs some of the energy and protects the inner conductor.

GOLD-PLATED CONNECTORS TO ENSURE A LONG SERVICE LIFE

To make sure that the connectors remain rust-free, they are coated with 24 Carat gold. This prevents them from oxidising. Plus: unlike many materials, gold is excellent at transmitting signals – for resistance-free transmission, completely without any interruptions.

DOUBLE SHIELDED TO AVOID FLICKERING

No flickering, even if several cables run in parallel or the smartphone is lying right next to the cable: the double shielding consisting of aluminium foil and copper braiding intercepts interfering signals. Even with stronger electromagnetic fields.

TC INNER CONDUCTORS FOR MAXIMUM SIGNAL QUALITY

Pin-sharp images, brilliant audio – even after years: the copper inner conductors are covered with a thin layer of tin (TC) to prevent them from coming into contact with water and oxygen. This means that they do not oxidise or corrode and they transmit signals excellently, just like on the very first day.

A FLEXIBLE AND ROBUST PVC JACKET

The robust PVC jacket protects the Clicktronic USB-C™ to DisplayPort adapter cable and keeps it flexible enough to bend around any corner – no matter how long it has spent in one position. The reason: the PVC does not absorb water, even in humid conditions. This means that the cable does not become porous.

SUBJECT TO CHANGE. MODEL SIMILAR. USB TYPE-C™ AND USB-C™ ARE REGISTERED TRADEMARKS OF THE USB IMPLEMENTERS FORUM. ALL BRAND NAMES ARE REGISTERED TRADEMARKS OF THEIR RESPECTIVE OWNERS.

USB-C™ TO DISPLAYPORT ADAPTER CABLE

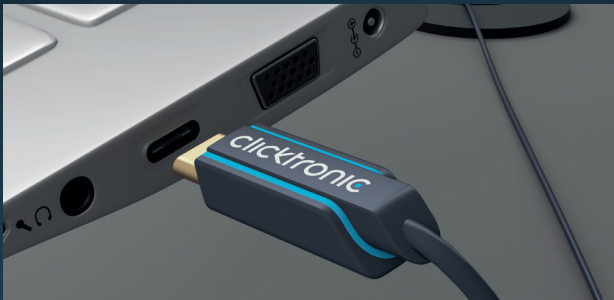

HIGH RESOLUTION OVER ONE METRE

Smooth streaming, presenting and gameplay: The Clicktronic USB-C™ to DisplayPort adapter cable allows you to transmit signals from a computer to a screen – over one metre and with a resolution of up to 4K (3840 × 2160 px) at 60 Hz.

SECURE HOLD, EASY TO INSERT

The USB-C™ plug is designed not to have a top and bottom. This makes it particularly easy to insert. The DisplayPort plug also locks automatically. It sits securely in the socket, the connection between all of the contacts is maintained perfectly and the transmission functions optimally – even when used with movable monitors. To disconnect the cable, simply press the unlocking mechanism on the DisplayPort plug.

INPUT

OUTPUT

ALL ADVANTAGES AT A GLANCE

HIGH RESOLUTION

From up to 4K (3840 × 2160 px) at 60 Hz with 32.4 Gbit/s.

SECURE HOLD

Thanks to the USB-C™ plug and the mechanical lock with an unlocking mechanism.

BRILLIANT SIGNAL QUALITY

Does not corrode or oxidise thanks to a tinned copper inner conductor (TC).

NO FLICKERING

Thanks to double insulation.

FLEXIBLE AND ROBUST CABLE

Thanks to the PVC jacket, which can be bent optimally even after years.

STRONG PLUG

PVC and ABS ensure maximum flexibility in the event of a jerk on the cable.

RUST-FREE CONNECTOR

Even after years – thanks to a 24 Carat gold coating.

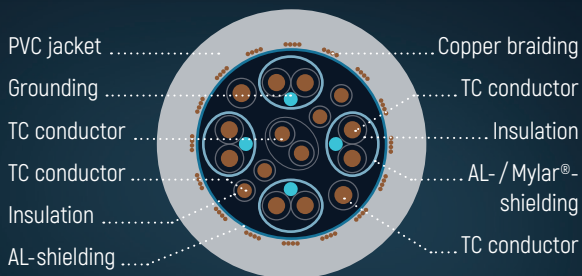

USB-C™ TO DISPLAYPORT ADAPTER CABLE

SIGNAL TRANSMISSION

TRANSMISSION TYPES: digital audio and video signals

MAX. TRANSMISSION RATE (Gbit/s): 21.6

CABLE CROSS-SECTION

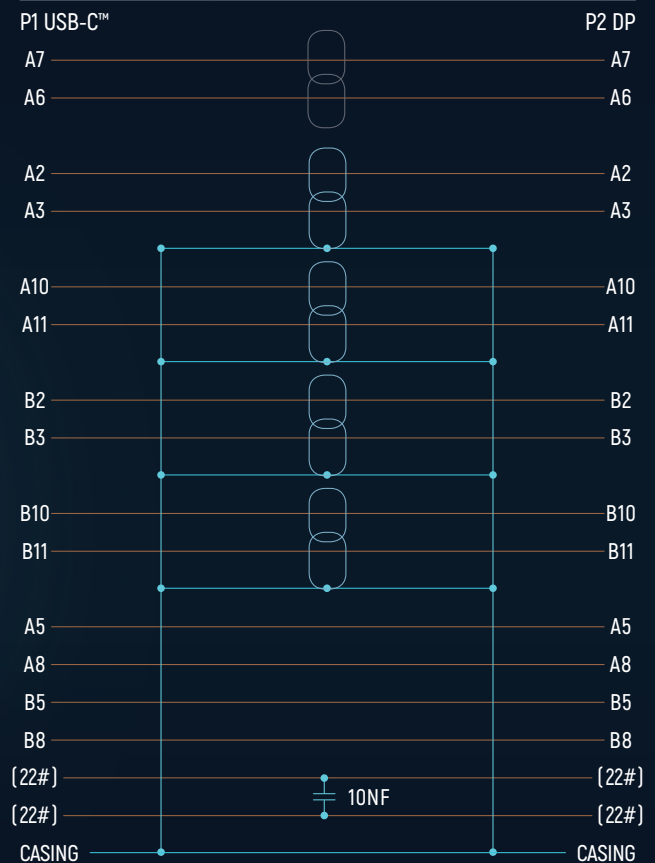

SUPPORTED FORMATS

USB PD 3.0, USB PD 2.0, DP ALT MODE
